

F I R E G U A R D

Won-Door FireGuard doors provide excellent separation for atriums, elevators and corridors yet fold into wall pockets, completely out of sight, until activated by traditional fire or smoke alarms in an emergency situation.

The project shown is the Jewish Home for the Aged in San Francisco. It has a total of 100,000 square feet. There are three atriums on each of three floors. Approximately 20,000 square feet of Won-Door FireGuard doors were used in 64 different openings.

This application demonstrates the feasibility and code acceptance of interior atrium designs. In addition, the doors meet the access and egress needs of all building occupants including the disabled.
