

The elevator lobby is back.

The new 2004 IBC Supplement requires elevator lobbies in all high rise buildings. Won-Door offers a time-tested, field proven fire-door that is both code-complaint and cost effective. Installed in the open position, this unique horizontal sliding fire-door is only visible in an emergency, providing fire separation as well as creating safe areas of refuge. Configuring a lobby with the Won-Door FireGuard will prove more economical than pressurizing the shaft. And only the Won-Door FireGuard can span unlimited widths, heights up to 23 feet – even curved openings. **For more information about Won-Door FireGuard visit www.wondoor.com or call 800-453-8494.**
